

How to create a quiz submission for ToysForYourBlog.com

The way this quiz system works is simple. There are a series of results a user can possibly end up with. Each answer they give gives a mark to a running tally for that result.

The following is a very simple quiz. There are three possible answers:

(Red)

(Green)

(Orange)

Lets call it the “What color are you quiz”.

Each question has the potential answers, followed by the result they score a mark for. Its important when designing a quiz to try and keep an even number of options so everything evens out by the end.

Q1: Whats your favourite?

A -> A bright campfire (Red)

B -> Fall colors (Orange)

C -> Spring flowers (Green)

Q2: Favorite fruit?

A -> Avacado (Green)

B -> Oranges (Orange)

C -> Apples (Red)

As you can see, if they select The answer A for Question 1 and C for question 2 they will get the “Red” result.

Each result then contains the title, a description and optionally a photo or image to illustrate the point.
